

**EMPOWERING
INDIVIDUALS,
REVOLUTIONIZING
FINANCE**

ABOUT US

Welcome to TopHodler, where cutting-edge technology meets savvy investment strategies. We specialize in expertly managing cryptocurrency portfolios to maximize returns and minimize risks in the dynamic world of digital assets. At TopHodler, we're pioneers in the realm of cryptocurrency fund management. With a team of seasoned experts and a data-driven approach, we craft tailored investment solutions to help you navigate the complexities of the blockchain market with confidence.

OUR VISSION

At TopHodler, our vision is to be the forefront of reshaping traditional finance through the transformative power of cryptocurrency. We envision a future where decentralized assets play a pivotal role in **shaping** a more inclusive, efficient, and transparent global financial system

OUR ROADMAP

BITCOIN HALVING HISTORY

Bitcoin halving history

Year	New BTC per block before halving	New BTC per block after halving	Price on halving day	Price 150 days later
2012 halving	50 BTC	25 BTC	\$12.35	\$127.00
2016 halving	25 BTC	12.5 BTC	\$650.53	\$758.81
2020 halving	12.5 BTC	6.25 BTC	\$8821.42	\$10,943.00
2024 halving	6.25 BTC	3.125 BTC	\$62,205.94	Yet to be known

The historic moment, which takes place every 4 years, will once again take place in April 2024 (when the number of blocks reach 840,000)! The first halving took place in November 2012, when the mining reward was reduced from 50 BTC to 25 BTC. The second halving took place in July 2016, when the mining reward was further reduced to 12.5 BTC. The third halving took place in May 2020, when the mining reward was halved again to 6.25 BTC per block. The halving is critical to Bitcoin's scarcity and inflation control, ensuring that its total supply never exceeds 21 million, in line with its deflationary principles.

POST BITCOIN HALVING EXPECTATION

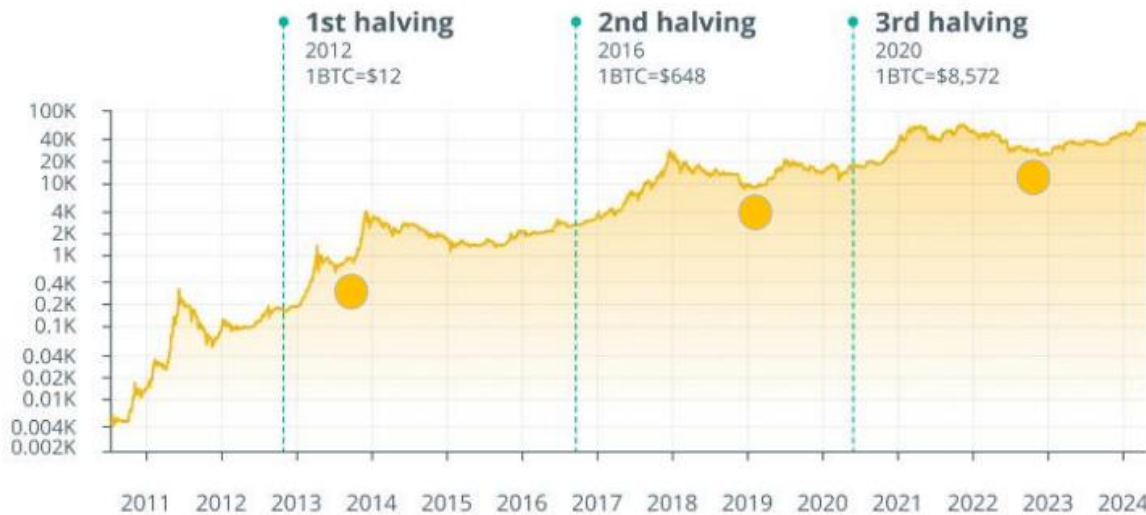

Halving	Date	BTC price at time of halving	Cycle Peak	Peak Price	Multiplier
1st Halving	28 th Nov 2012	\$12	(Nov 2013)	\$1,170	97.5x
2nd Halving	9 th July 2016	\$674	(Dec 2017)	\$19,650	30x
3rd Halving	11 th May 2020	\$8,418	(Nov 2021)	\$67,500	8x
4th Halving	April 2024	~\$64,120	?	?	4x? 5x?

Historically, post halving has had a significant impact on the price of Bitcoin and has led to a significant increase in price! This is an exciting time for both investors and traders. The current cycle seems to be closely related to past market cycles. Many cryptocurrency experts believe that the price dynamics of Bitcoin may be similar this time, which means that we will once again see a significant increase in the price after the event. Whether you're a seasoned crypto investor or just starting out on your crypto journey, it's important to seize this bull market opportunity

POST BITCOIN HALVING

Bitcoin halving cycle phases

Bitcoin halvings have been historically associated with postevent rallies, usually coming in about 3 months or later.

12 months after the 2012 halving \$1,170 (97.5x)
17 months after the 2016 halving \$19,650 (30x)
18 months after the 2020 halving \$67,500 (8x)
17 months after the 2024 halving \$320,000 (5x?)

However, this ongoing cycle has been very different from the past in terms of Bitcoin halving characteristics. One such difference is that Bitcoin experienced an extraordinary bull run before the fourth halving, reaching a new all-time high right before the event. Such a price trajectory has never been seen before in the history of Bitcoin. Even considering this recent pullback, Bitcoin has still been up 35% since the start of the year. Those who have entered, must hold on for the boom. for those who haven't come in, must come in now.

Pros and Cons of Investing in Cryptocurrencies

Investors are attracted to cryptocurrency due to its **high volatility**. It's not uncommon for a cryptocurrency's price to **fluctuate over 10%** in a single day. This is great if you're looking for high returns, but if you're a risk-averse investor then investing in cryptocurrency may not be for you.

Frequently Asked Questions

What was the first cryptocurrency?

Is cryptocurrency real money?

Can I invest \$100 in Bitcoin?

The first cryptocurrency was Bitcoin, which was created by an anonymous figure named Satoshi Nakamoto in 2009

Frequently Asked Questions
